

Claims of this Invention

What I claim as my invention is:

1. A method and process which allows a shopper to exam the inventories and inventory prices of their local grocery stores before they shop or during the shopping experience, and allow the shopper to methodically compare each local grocery store's inventory and prices and to make suggestions to the shopper of what and which grocery store to purchase their goods at in order to save money.

2. The method of claim 1, wherein: a shopper uses an internet browser connected via the internet to this invention's web site address and uses information contained within to conduct comparative shopping of local grocery stores.

3. The method of claim 1, wherein: a database that contains descriptive information of local grocery store inventories and the inventory's prices. Descriptive information is the Uniform Product Code, item description, item size or weight, price and unit price, table containing all known Uniform Product Codes of items used in any grocery store.
